DO THEY FEED?

Question Secretary Alger is Asking.
Reliable Information Wanted as to Klondikers.

Story of Cattle Importations Puzzling Him.

Regulations for St. Michaels Reservation Announced Four Men and Fifteen Thousand Dollars from Cook's Inlet.

[BY THE TIMES SPECIAL WIRE.]
WASHINGTON, Nov. 12.—[Special Dispatch.] If there is any person in the United States who has in his possession accurate information about the condition of miners in the Klondike region, or their chances of getting through the winter without starving to death, the War Department of this government would like to hear from him. A few days ago, in response to urgent appeals from Portland and other places in the Northwest, the Secretary of War made up his mind that he must get ahead with measures to get food to the miners reported to be on the verge of starvation, in the interest of humanity, without waiting for Congress to authorize him.

Yesterday came the report that Klondike miners would laugh if they could know how anxious people are about their welfare. This report declared that ten thousand head of cattle were driven into the Klondike country from Juneau before the Chilkoot pass was closed by snow. If this is so, the miners are in no danger of starvation.

Secretary Alger does not know whether the story is true or not. He has no means at hand of proving or disproving it.

MINERS FROM COOK'S INLET.
Four Men Arrive with Fifteen Thousand Dollars in Gold.
[ASSOCIATED PRESS NIGHT REPORT.] SEATTLE (Wash.), Nov. 12.—The steamer City of Topeka arrived here today from Juneau with \$15,000 in gold, the property of four men, J. M. Haddy, F. E. Rickson, M. McBeth and J. C. McLean, who have been mining in Cook's Inlet. They estimate the total cleanup of Cook's Inlet this season at \$200,000.

RICHNESS AT MINOOK.
[ASSOCIATED PRESS DAY REPORT.] ALAMEDA, Nov. 12.—Report comes from Yukon River that ex-Conductor William Parker of this city and the Schneider brothers of Fruitvale, who were the first to leave for the Yukon diggings in the summer, have struck it rich at Minook, and have found claims that will pay them handsomely. They expect to spend the winter working their claims, as they have provisions enough to last a year.

ST. MICHAELS RESERVATION.
Secretary Alger Issues Regulations for the Government Thereof.
[ASSOCIATED PRESS DAY REPORT.] WASHINGTON, Nov. 12.—Secretary Alger has issued regulations governing the use and occupation of lands within the limits of the St. Michaels reservation, Alaska. The regulations are substantially as follows:

Applications for permission to conduct legitimate business enterprises must be accompanied by testimonials of good character and standing, reciting the nature of the business to be conducted; the applicant must, if possible, on unoccupied land within the reservation; the area of land necessary; number and character of buildings, etc., to be erected, and probable date when occupancy is to be commenced and terminated. Those located on this reservation at the time the reservation was made will be like manner present their applications for permits. The permit will authorize the grantees to maintain the specified business, and none other, at the places named. The permit will not be subject to disposal of no value or effect until presented to, and recorded by, the commanding officer of Fort St. Michaels and the local land office. The permit will be transferable without the approval of the Secretary of War, except where both parties to the transfer are on the reservation and one of them has an interest, in which event the commanding officer of Fort St. Michaels may authorize the transfer. It will give no right or title to ownership of lands, and is revocable at the will of the Secretary of War. Occupants under these permits will be subject at all times to such police regulations as may be imposed from time to time by the commanding officer of Fort St. Michaels or higher authority.

In case of naturally constructed landings, sites for buildings or shipyards, no monopoly will be given to any person or corporation, and no permit will be construed to do this, and all disagreements between holders of permits will, after a hearing by him, be settled by the commanding officer of Fort St. Michaels. No sale of intoxicating liquors in the reservation will be allowed, but this prohibition shall not include light wines or beer.

It is to be understood that these permits are issued subject to any subsequent legislation of Congress. Provision is made for reserving sufficient lands for the post at St. Michaels, and for the modification and termination of permits.

Artificial Respiration.
ST. PAUL, Nov. 12.—Miss Mathilda Anderson, a young woman who has been kept alive at the City Hospital for six weeks by artificial respiration, died last night of congestion of the lungs. For forty-two days the nurses and physicians of the hospital have been filling her lungs with air by artificial means, at first by raising and lowering the arms, and when that became painful by operating on the chest. By this method, however, the lungs were partially filled at last, and had the nurse stopped even for five minutes Miss Anderson would have strangled and died.

THE OAKWOOD OUTRAGE.

We have heard of brutality in Cuba, perpetrated by the Spanish soldiery, and have been duly shocked. But the story which comes from Oakwood, O., of the outrageous treatment of two young girls by Whitecaps fairly out-Weyers Weyler.

It appears from the dispatches that two young girls of the hamlet of Oakwood, O., aged respectively 19 and 17 years, had for some reason incurred the disapprobation of certain persons of the vicinity, and that they were anonymously ordered to leave the town and county. The specific offense of which the girls were guilty, or were supposed to be guilty, is not stated. At any rate, it seems, they chose to ignore the warning, and were therefore assailed, in the night, by a band of eight or ten alleged men, who dragged them from their beds into the public highway and administered to them a terrible whipping upon the bare flesh, afterward covering their bodies with a coat of tar and feathers. They were then taken back to their rooms and left to their fate. When discovered, next morning, the girls were in an unconscious condition, and one of them, the younger, is critically ill from the injuries received, her flesh having been cut to the bone by the cruel whip, wielded by men (so-called).

If this story of outrage had come from Cuba, instead of from an Ohio hamlet, it would not have been so unbelievably as it is. For it seems scarcely credible that a crime so dastardly could have been perpetrated in the enlightened State of Ohio. It is to be hoped, for the credit of that commonwealth and of the American name, that the story is false, or that at best it is grossly exaggerated. Should it prove to be true, the civilization of Oakwood, O., must be placed in a scale away below that of Terra del Fuego, or of Patagonia, or of the Fiji Islands.

Whatever may have been the faults or the frailties of those unfortunate girls, there was no shadow of warrant for the brutal treatment to which they were subjected. The despicable wretches who were guilty of the outrage, by participating in it, placed themselves on a lower scale of morality than any to which the victims could possibly have sunk.

If the perpetrators of this outrage are apprehended, they should be punished to the utmost limits of the law. It is a pity that they cannot be subjected to the same course of treatment as they administered to their helpless victims. They deserve to be punished and then shunned by decent men for all future time, as monsters too loathsome for association with their kind.

It would seem to be about time for the authorities of Ohio, and of other States where organized bands of ruffians under the name of Whitecaps have their lair, to institute vigorous measures for the suppression of this diabolical form of lawlessness.

Durant still lingers "superfluous on the scene," as the day of his execution is again placed in the realm of uncertainty. The disgusting delays and "monkey business" in this case have aroused the indignation of the entire people of the State of California, but there seems to be no other course for them to pursue than to "grin and bear it" as patiently as they may until the farce is played out to the end. It is not too much to say that a mockery is being made of justice, and that public sentiment is being so warped by the movements in this case that appeals to Judge Lynch are likely to be made rather than to the constituted courts of the land, to the end that right may prevail and the guilty be punished. California is being disgraced, by the conduct of this case, in the eyes of the civilized world.

The death of Count Achilles de Vecchi, an Italian nobleman, at Washington, D. C., is not only a very distressing affair, but it is a striking commentary upon the unreliability of expert evidence. The Count was an expert on the subject of fungi, and was certain that some mushrooms which he bought of a farmer were non-poisonous. He invited a friend to breakfast with him, and both ate heartily of the mushrooms. Within two hours thereafter the Count became unconscious and died a few hours later, while his friend had a narrow escape from a like fate. There is one way to avoid accidents of this kind, and that is to eat no mushrooms,

whether edible or otherwise. It is a pretty good way, too.

Everything that was said at the time of the purchase about the government postoffice site at San Francisco is shown, by the excavating now going on, to have been true. It was evident at the outset that Uncle Sam was being lured by a gang of real estate sharks, but there was doubtless a "rake off" somewhere which blinded the eyes of the purchaser's agents, and has led the people to attempt the planting of a great structure in a quagmire. It promises to cost a pretty penny more than it ought, to construct the new building, but so long as the scheme has been worked and the schemers have pocketed the proceeds, the public must take its medicine and pay the piper while the other fellows dance.

Tod Sloan, the American jockey, continues to show to the hypercritical Brits some points in riding horses to win that they never knew before. His victories on the turf have demonstrated to even that bigoted race of sports that there are some things we do quite well in this country, including the pushing of horses under the wire ahead of the field. Mr. Sloan may not be much on style—English style, that is—but as a winner he is a regular swell. So long as a man can win in this country we forgive him, even if he is a regular gawk, and our English friends appear to be coming around rapidly to the same way of thinking.

Tesla, the uncommercial electrical marvel, who serves admirably as a "feature" for exploitation by the yellow newspapers, has now discovered a remedy for rejuvenating the human race, which lays "Laird's Bloom of Youth" and the "Balm of a Thousand Barrels of Flour" completely in the shade. It is certainly to be hoped that Mr. Tesla may be more successful as a beauty doctor than he has been as a wizard who achieves practical results in the domain of electrical science. Mr. Tesla has invented more things that "don't go" than any other "scientist" who ever got himself boomed in the newspapers.

Ohio has again fallen into disgrace through the outrageous punishment administered to two young girls by a band of cowardly Whitecaps. The perpetrators of this crime ought to be brought to justice, if it takes the last dollar in the treasury and the last man in the State of Ohio. The mother of statesmen and Presidents cannot afford to permit even her sinful daughters, granting that they are such, to be thus publicly and feloniously punished by a band of miscreants, to whom sudden death would be all too light a punishment.

The able jurist who conducts the fortunes of a twilight sheet says a bicycle is not a vehicle, thus overruling a decision of the Supreme Court and playing hob generally with the laws that have been called upon to protect wheelmen in their rights on the highways. The right to appeal from the decision of the twilight court is still open to the City Council.

By the way, has anybody noticed how profoundly silent Alfred Austin, the British poet laureate, has been since the Transvaal incident? It is a silence which is very, very golden—and dense. If Alfred can only keep it up indefinitely, the *entente cordiale* between Great Britain and the rest of the civilized world can probably be maintained.

It is to be hoped that our Chinese friends will not become confused in the initials of the new Envoy Extraordinary to that country and fall into dire distress for fear their typanums are about to be ruptured by shouts and howls about the crime of '73. There are Bryans and Bryans; for which, heaven be praised.

Our English friends are inclined to be somewhat peppery in their comments on American customs and institutions; but it is noticeable that English capital keeps right on coming to this "bloody barbaric country" for investment. John Bull's bark is a great deal worse than his bite.

The Baltimore American says that the prices of farm lands in Maryland are advancing steadily. It may be mentioned, as a fact not altogether unconnected with this condition of things, that Maryland supported the Republican ticket by a comfortable majority at the last election.

There will be much to be grateful for at the coming Thanksgiving. Even

our Demopop friends will have cause to rejoice that the Republican party saved them from themselves, and brought about a return of prosperity in spite of their violent and virulent opposition.

Van Wyck received 42,941 votes less than a majority of the total vote of Greater New York; from which it is plain that the anti-Tammanyites, if they had buried their bickerings and concentrated their forces, could have carried the day easily and had votes to burn.

We are promised that a royal decree granting autonomy to Cuba will be formally gazetted at Madrid on November 23; but as the Cubans do not want autonomy, but freedom, the decree will probably prove no more binding than a wisp of straw.

Uncle Abe's granddaughter, who ran away the other day and married the man of her choice, has shown the true American spirit, at least. Let us hope that she has shown her grandfather's great good judgment in her selection of a man.

The Kansas City Star says: "Henri Waterson can get on without politics a good deal easier than politics can get on without Mr. Waterson." Yes, perhaps, but each will be frightfully lonesome without the other.

Boss Croker might as well dispose of his racing stock and confine his efforts to the municipal pie-counter of Greater New York, which appears to offer him extraordinary opportunities.

The infamous Mrs. Nock may learn that there is truth in the old legend that "He who tells the first story has not a ghost of a show with the fellow who tells the last one."

Capt. Lovering, the hero of Fort Sheridan, would make a valuable addition to the staff of ex-Butcher Weyler. He has the Weyler methods down so mighty pat.

The pleasantest thing the Chicago man finds in his home paper these days is a small advertisement bearing the heading, "Seventy-two Hours to Los Angeles."

The young man who was married the other day in a lion's cage clearly demonstrated that he is afraid of neither woman nor beast.

There is talk of having a mint in the Klondike country, but whether it is for Juleps or coinage purposes has not been announced.

Barnum & Bailey's circus is going to Europe, but it will probably frighten shy of Austria while the Reichsrath is in session.

If the Austrian Reichsrath is not controlled by a Populist majority, it certainly belies its public deliberations.

"Bob" Lincoln seems to have acquired a son-in-law and a mighty fine job at one fell swoop.

Let us fondly hope that Richard Folsom Cleveland won't grow up a muggump, like his papa.

Business—And How to Get It. [Oakland Enquirer, Nov. 10:] The Los Angeles Times publishes a comparison of advertising business, which shows that on a recent Sunday it (The Times) printed 134 columns of advertisements, while the San Francisco Examiner had 73, the Call 62, and the Chronicle 53. The amount of advertising which is done in the Los Angeles Times, the leading daily of a city of 100,000 people, is one of the wonders of the newspaper business.

Not only are the principal business houses represented by large display advertisements, but there are columns on columns of small advertisements, "set solid," as the saying is, and "showing that whenever anybody in Los Angeles has anything to sell he straightaway advertises it in the newspaper. This is one secret of the great success of the Los Angeles Times. They do more new advertising than any other set of business men in the West, and their rewards are in proportion. In this connection we might call attention to the fact that the merchants of Oakland have recently been advertising to a larger extent than they formerly did, and a number of them have been quite surprised by the large addition to their business which they have received.

LETTERS TO THE TIMES.

The Artists of Song. [To the Editor of The Times:] During my seven years' residence in Los Angeles I think I may truly say that this city has not had such a vocal musical treat as in the concert given by Mr. and Mrs. Henschel on Thursday night in his "Musical Mention" of today (Friday), when he says that a "criticism of the recital would involve an unmeasured use of superlatives, for whether the numbers were grave or gay, dramatic or romantic, heavy or light, they were always characterized by the same thoroughly artistic finish, the same sincerity and perfect sympathy." Indeed, I may say that the feeling of satisfaction, of repose, as if we had had something almost superhuman, was identical with the feeling engendered by Paderewski's wonderful and artistic rendering of themes on the piano. I confess that the singing of Mr. and Mrs. Henschel was a revelation to me. I have heard some of the very numbers rendered by them sung by the first artists of the old world, by Italian, German, French and English masters and mistresses of song, and can speak with some degree of impartiality when I say that never was first musical sense so satisfied as this evening when this German gentleman and this Ohio lady—both now of world-wide reputation—sang the numbers on the programme. I remember distinctly a concert given in London in 1849, when Michel de Costa (he was not then knighted) led the orchestra, and there were such singers as Mmes. Grisi, Viardot Garcia, Domy Gras, Catherine Hayes and other prima donnas; such gentlemen singers as Tamburini, Mario Herr Mengis and others—but there was no such satisfaction derived from the concert of Mr. and Mrs. Henschel, was glad to see present the first musical sense so satisfied as this evening when this German gentleman and this Ohio lady—both now of world-wide reputation—sang the numbers on the programme. I remember distinctly a concert given in London in 1849, when Michel de Costa (he was not then knighted) led the orchestra, and there were such singers as Mmes. THE WEATHER.

U. S. WEATHER BUREAU, Los Angeles, Nov. 12.—At 8 o'clock a.m. the barometer registered 30.07, at 5 p.m. 30.07. Thermometer for the corresponding hours showed 52 deg. and 58 deg. Relative humidity, 5 a.m., 81 per cent.; 5 p.m., 78 per cent. Wind, 5 a.m., north, velocity 1 mile; 5 p.m., west, velocity 6 miles. Maximum temperature, 72 deg.; minimum temperature, 48 deg. Character of weather, clear. Barometer reduced to sea level.

The Times

ALL ALONG THE LINE.

The local agent of the Southern Pacific does not think the merchants of Los Angeles intend to withdraw business from his line. He will go on "not thinking," which is a common habit of Uncle's agents, until the S. P. gets a punch in the solar plexus from the combined shippers of Los Angeles.

It may be true, as some of the police detectives assert, that the bunco men who infest Los Angeles are not amenable to the law and can be suppressed only by continual exposure in the newspapers, but if this be true, why do these same detectives do everything in their power to shield the bunco men from exposure? Is it because the habit of making a mystery of everything they do has become chronic?

The settlement of the litigation involving the valuable group of mines which first drew attention to the Randsburg district is an event of no small importance. These mines have paid almost "from the grass roots down," and they have been worked continuously through all the legal controversy over their ownership. The amicable conclusion of the suit will be followed by developments in the mines on a large scale, which should add materially to the prosperity of the camp.

The fact was brought out at the Pomona Society's meeting in Pomona Thursday that a few oranges have been found in several sections containing worms which had eaten to the heart of the fruit. Tests are being made to ascertain whether these are the Mexican orange worm, of which there seems to be little room for doubt. There is no occasion for a scare among orange-growers in consequence of this unwelcome find, but it is well for the growers to know of the presence of a few of these worms in the country, that they may be at once put on their guard and take steps to protect orchards from an increase of the pest.

Whatever may be the delinquencies of the Southern Pacific, the officials of that remarkable concern are ever rendering service to the cause of national gaiety by enriching the vernacular with unique expressions. "Caved down the bank" was an excellent invention; "All the traffic will bear" has taken its place in railroad literature, and now an agent of the "Octopus" edits the world with a new term: "Equated." Goshen is 241 miles from San Francisco and the same distance from Los Angeles, but after having been "equated" by the Southern Pacific, Goshen is 535 miles from Los Angeles and 255 miles from San Francisco. When the S. P. wants an excuse for not reducing freight rates, it "equates" them. Equated rates are quite different from equal rates.

SHOPLIFTERS ABRAIGED.

Seven Complaints Against Each and Demurrers to All of Them.

The two alleged shoplifters, Mrs. Massey and Mrs. Bebbelheimer, were both in court yesterday afternoon when Justice Owens called them for arraignment on seven charges of petty larceny. Two complaints have been filed against each separately and five jointly. Detective Goodman says there are others to follow.

Both women were represented by counsel, Jud Rush appearing for Mrs. Massey and Henry T. Gage for Mrs. Bebbelheimer. The attorneys waived reading of the complaints and filed a demurrer to each of them. The demurrers were identical in substance, the complaints being demurred against on nine technical counts, including question of jurisdiction, ambiguous wording, etc., etc.

November 22 at 3 p.m. was set for argument on the demurrers. Bond was fixed at \$300 in each of the cases, for which bail had not already been given. The husbands of both women were present, as were many of their friends, and acceptable bondsmen were found without difficulty.

Mrs. Bebbelheimer looked abashed and avoided the gaze of the courtroom habitués by turning her face toward the wall while seated in the dock. Mrs. Massey wore a light veil and faced the crowd boldly, although it was plain that she considered her situation anything but an enviable one.

TEN THOUSAND DOLLARS.

Claimed as Damages from a Grocery Firm.

A new damage suit for \$10,000 has been commenced against Rice Bros. grocery, by Ethel West, through R. D. List, who represents her in the action as guardian. A similar suit was brought about two months ago, but was dismissed by Judge York on account of irregularities in the complaint. In the new complaint, filed yesterday, it is alleged that Mr. and Mrs. William West ordered a can of kerosene from Rice Bros., a year ago, and found subsequently that gasoline had been delivered by mistake. At night one of the lamps, filled with the gasoline, was lighted. An explosion followed, and Mr. West picked up the lamp from the table and threw it into the back yard. It appears that Ethel rushed from the house as soon as the gasoline began to explode, and when father threw the lamp into the yard she was bespattered with the burning oil. Her face and body were badly burned, necessitating her confinement for several weeks.

Woodmen of the World. Last evening at 8 o'clock Los Angeles Camp of the Woodmen of the World met in Liberty Hall and completed the organization. Organized by C. C. Lock and installed the officers-elect as follows: C. C., Zue G. Peck; Past C. C., Ed Smith; Adviser, Lieut. Charles B. McConnell; Banker, H. A. Mackenzie; Clerk, C. J. Dintond; Escort, Walt Dampf; Watchman, John A. Gillis; Sentry, H. McCallan; Physician, H. G. Cates; Managers, W. F. Windhurst, F. A. Harrington.

Fire at Pico Heights. A still alarm of fire was sent in at 11:10 p.m. yesterday from Pico Heights, and the chemical engine responded, as there is no water for fire purposes in that locality. An overturned lamp caused the fire in a house on D street near Pico, owned and occupied by Mrs. Church. The house, valued at \$1500, was destroyed. The furniture was insured for \$250, and a part of it was saved. Mrs. Church holds the insurance on the house.

THE GOOD TEMPLARS.

CLOSE OF THE SESSION OF THE GRAND LODGE.

Action on Uniform Constitution—Installation of Officers—Excursion to Mount Lowe—Next Session at San Francisco.

The thirty-eighth session of the Grand Lodge, Independent Order of Good Templars of California, ended yesterday.

The first business to occupy the attention of the assembly at the session yesterday morning was the matter of the adoption or rejection of the uniform constitution, the discussion of which was laid over from the previous evening. The matter was discussed, pro and con, and the fact pointed out that California is the only jurisdiction in the world that has not already adopted the uniform constitution. Many of the delegates were not sufficiently well posted on the question, and the necessary two-thirds vote for the adoption failed by a vote of 72 to 66. A resolution offered by Rev. Frank B. Coulter of Selma was adopted instructing the Grand Secretary to order a sufficient number of copies of the uniform constitution, so that all the lodges of the State may become sufficiently familiar with it to allow of its adoption at the next session of the Grand Lodge.

A report of the Committee on Juvenile Work was read by Mrs. Anna Schultz Pierce of Pasadena, chairman of the committee, and action taken which, while proving a trifle more expensive, will be more effective. Mrs. M. E. North of San Francisco, Grand Secretary of the Juvenile Work, made quite an address on the report, saying, among other things: "We need the Bands of Hope, where the young children may receive the right kind of training to aid them in after life in all its phases." Action on a number of amendments to the constitution offered by the Committee on Law and Usage was deferred until the next session of the Grand Lodge.

The following resolutions, offered by Judge J. M. Walling of Nevada City, were unanimously adopted: "Resolved, that the thanks of the Grand Lodge are especially and are hereby tendered to the faithful and efficient Committee of Arrangements of the Pasadena Lodge, as the result of whose careful preparations this session has been one of the happiest of late years. Also, to Pasadena Lodge as a whole, for their untiring efforts to make our stay at this session thoroughly enjoyable."

"Resolved, that our thanks are due and are hereby tendered to the press of Los Angeles and Pasadena for their full and fair reports of the proceedings of this session, and for the very kind notices of the Grand Lodge as a whole and individually, and also to the citizens of Pasadena generally for the many acts of kindness extended; also, to various transportation companies for favors extended."

The gratifying report was made during the session, that the amount pledged for the Home for Orphans as a result of the meeting on Thursday night reached the total of \$1887.

An invitation was received from the One Hundred Thousand Club of Fresno to hold the session of the Grand Lodge of 1928 in that city, and an invitation having also been received to hold the next session in San Francisco, a ballot on the question was taken, resulting in favor of San Francisco by a vote of 81 to 59.

After some discussion the time for holding the annual sessions of the future was fixed at the second Tuesday of October.

The annual "candy collection" for the Home for Orphans was taken up and netted \$1076 for the purchase of sweets for the walls.

It approached the noon hour before the installation of the new officers was in order, but as it was desirable to close the session at noon, the event occurred as the final act of the session. Past Grand Chief Templar Judge J. M. Walling presided as installing officer, and the following officers were installed for the ensuing year: Grand Chief Templar, Hon. Theodore D. Kanouse, Glendale; Grand Vice Templar, Miss Ida Tully, Fresno; Grand Counsellor, Rev. Frank E. Coulter, Selma; Grand Secretary, W. P. Netherton, Santa Cruz; Grand Treasurer, Volney Taylor, Oakland; Grand Superintendent Juvenile Work, Mrs. E. M. North, San Francisco; Grand Marshal, E. D. Gripper, La Mesa; Grand Deputy Marshal, Mrs. H. S. Hubbard, Santa Monica; Grand Chaplain, Amos Wright, El Monte; Grand Messenger, E. M. Wilson, Adin; Grand Assistant Secretary, B. R. Baldwin, Santa Cruz; Grand Guard, Lilla Locke, Lockeford; Grand Sentinel, J. A. Eddy, Templeton; Grand Trustees, Fred Taft, Santa Monica, A. M. Drew and A. A. Smith, Fresno.

The present is the eighteenth time Hon. T. D. Kanouse has been favored with an election as Grand Chief Templar, having served once before in California and twelve years in Wisconsin.

After the statement by the Grand Chief Templar that he would send the committee of the Grand Lodge after appointment to the several lodges in order of appointing them at this session, a number of brief remarks were made by several officers, and the thirty-eighth session came to a close at about 1 p.m.

In the afternoon a large number of the delegates availed themselves of an excursion to Mt. Lowe, while others were given carriage rides about the city by Pasadena friends, and others departed for their homes.

As an aftermath of the session, a prohibition rally will be given at the Temperance Temple in this city today, beginning at 10 a.m., and will be participated in by a number of the delegates, notably Past Grand Chief Templar Webb and Grand Chief Templar Kanouse, while Rev. W. J. Hall and Thomas Hendry, soloists, will lend their services in the matter of singing. State Chairman Rev. Frank B. Coulter of Selma will preside. The rally is for the purpose of making plans for future work in the State. A. J. Taynter of Berkeley, Grand World Patriarch of the Sons of Temperance of the United States, will be present and during the day will call a meeting of members of that order with a view of instituting a lodge in this city.

The following additional facts regarding the founding and maintenance of the home for orphans has been gleaned: At the Grand Lodge session in Sacramento, in 1867, Mrs. Elvira Baldwin, the first Grand Vice-Templar of California, introduced the following resolution: "Resolved, that a tax of \$1 be levied annually by the Executive Committee, upon each member of the order, to be set apart as a special fund for the purpose of purchasing and maintaining a suitable home for the orphans of all Good Templars."

present when the original resolution was presented—Judge Robert Thompson of San Francisco and Prof. William Crowhurst of Oakland. "Orphans' night" originated in 1888, and has been continued at every Grand Lodge session since.

The Southern California State Sunday-school Association, convenes at Pomona, December 7, 8 and 9.

The Henkel concert begins promptly at 8 p.m.

Souvenir day. The Unique. Souvenir sale. The Unique. Gift sale. The Unique.

The Y.M.C.A.-Military Academy football game today will be on the Academy grounds, at 3:30 p.m.

The Prohibitionists of Los Angeles city and county will hold a meeting in Temperance Temple, at 10 o'clock today. Addresses will be made by State Chairman Coulter, Chief Templar Webb, Dr. J. P. Widney, and others.

Los Angeles Camp, No. 8, of the Army and Navy Republican League, will hold a business and social meeting on Saturday evening next, at Elks' Hall, 104 South Main street. All ex-soldiers and sailors are cordially invited to attend.

The Star and Crescent Literary Society of the city will hold a high school held its regular meeting in the auditorium yesterday. The programme included readings, recitations and music.

The chief feature was the exhibition of "living postals" by the society.

Rev. M. C. Briggs, D.D., field secretary of the California State Sabbath Association, had arranged a list of engagements in the line of his work in Southern California. The door has been, and is, very ill at his home in San José, and the meetings have been deferred until his recovery.

The regular monthly meeting of the Merchants and Manufacturers' Association will be held Monday evening, November 15, at 8 o'clock. The request of the Freighters' Association of San Francisco, for the support of the merchants of Los Angeles in establishing a competing Pacific Coast steamship line will be discussed.

MUST HITCH NO MORE.

JUSTICE OWENS PASSES ON THE NEW ORDINANCE.

He imposes Light Fines in Two Cases and Dismisses Ninety Others who were charged with Obstruction to Defendants to Sin No More.

The hitching-ordinance violators had their innings in the Police Court yesterday afternoon, and it was a very brief one.

Of ninety odd complaints filed, Justice Owens disposed of all but two at a breath, by dismissing them without a hearing or motion on the part of the City Attorney.

Justice Owens said, in explanation of this action, that the enforcing of a new ordinance was attended by some friction. The people had to have time to get used to the new order of things, and he was disposed to be lenient with first offenders in cases of this kind. Besides he understood that it was not the intention of the City Attorney's office to be too drastic in the enforcement of this ordinance until public opinion became settled as to its merits.

Speaking for himself, Justice Owens said he believed the ordinance to be all right in a general way, but it doubtless had some defects that could be remedied by amendments that would suggest themselves as it now stood. It was a good ordinance as it now stood, if horse sense were exercised by both sides—that is, by the public, on the one hand, and the police on the other. He did not believe in punishing a man who let his team stand for a few minutes in front of a building while he stepped inside to transact a little business. It was to prevent habitual blocking up of the business streets with idle teams that the ordinance was intended.

After warning the defendants not to violate the ordinance again, all were discharged but two. The hold-overs were George Knarr and Joe Sakowitz, two of the most recently arrested.

Knarr pleaded guilty, but explained that he was not aware that the forbidden district extended north of Temple street on Main. He thought he was perfectly safe in hitching in front of the Farmers' and Merchants' Bank, and was not aware of his mistake before he found himself under arrest.

Justice Owens said he knew of one case where a man consulted an eminent lawyer as to the merits and bounds of the proscribed district, and then made the same blunder as Mr. Knarr. The court accordingly let the defendant off very easily with the nominal fine of \$1.

Defendant Sakowitz pleaded guilty, also, and was fined \$2 because it was his second offense since the ordinance went into effect.

All the discharged defendants who had cash bail up were notified that they could draw it out today.

There were four arrested yesterday for violating the hitching ordinance: the victims being H. Greening, C. H. Stock, Joe Sakowitz and Joseph Yoder.

that the Best Drugs are sold by Sale & Son is being sup-
plemented by another—that Sale's prices are the lowest.

Sale & Son,

Wholesale and Retail Druggists. 220 S. Spring St., Los Angeles.

ELECTRICITY The Life Giver, The Sick Healer.

Pains and aches disappear as if by magic. Rheumatism, Lumbago and Sciatica relieved quickly. For female complaints there is nothing known in medical science that gives such immediate and permanent relief. No disturbing necessary. Nervous and broken down people are made strong. No pain or ache can withstand the wonderful power of the great static machine when used in connection with vitaphysic. Static, Galvanic and Faradic Electricity scientifically applied for the relief and cure of all chronic, nervous and debilitated diseases. Massage, Solar and Chroma treatments, Sanatory Compound Medicated Baths of every kind. Consultation Free. Fourteen years' practice in this city. Call or send for pamphlet. See sworn statements at office. The largest and most fully equipped Institute of the kind in Los Angeles. X-RAY DIAGNOSIS.

DR. WM. J. DAWSON, Electro-Vitaphysic Physician, 733 S. Broadway.
Telephone 1733 Red Between Seventh and Eighth Streets.

LOS ANGELES AND VICINITY.

Perfume from Flowers.

During the past dozen years the question of manufacturing perfumes from flowers in California has frequently come to the front, and has been discussed from time to time in the newspapers of the State. Sundry attempts have also been made on a small scale to start the manufacture of such perfumes. Several years ago a big project of this description was outlined on Baldwin's Ranch, at Santa Anita, in which a member of a French perfumery company was interested. The enterprise was not carried out. There are small industries of this kind at Riverside, at Ontario and elsewhere.

The question as to whether perfume can be profitably manufactured from flowers in this section has recently been revived, a resident of the San Gabriel Valley having taken the ground that the rates of labor paid here make it impossible to successfully conduct such an enterprise, while George C. Gilbert of Ontario, who has been engaged in the perfume business for sixteen years, maintains that perfumes may profitably be manufactured here.

As to the successful raising in Southern California of flowers and plants used for the manufacture of perfume, there can be no question. There is not a plant or a shrub that is grown for perfume on the Mediterranean side of France, or in Italy, that will not come to perfection in California. Already a number of East India flowering plants and shrubs have been domesticated here. It is true, with hardly a qualification, that the entire list of plants now cultivated for the manufacture of commerce are at this date growing in this State. The fact that they are not cultivated on a large scale is due to the lack of facilities for processing the product into an article that finds a ready sale.

To verify this statement, one has only to apply to some gardener who is cultivating plants for the market. He will undertake to furnish every flowering plant and shrub now cultivated in France for perfume, and will add to the list a number of other rare plants that might be used for the same purpose. Thyme, rosemary, lavender, mignonette, jasmine, bergamot, violet, heliotrope and tuberoses are so common in the gardens of this State that no one now thinks of designating any of them as rare plants. In many gardens it is not an unusual circumstance to find from sixty to ninety varieties of roses, all growing within a plot of less than a quarter of an acre. Not all of these would be suitable for the manufacture of commercial perfumes. But in the list will be found about all that are considered of value for such purposes.

On the other hand, it is claimed by some, and there seems to be ground for the assertion, that many of the flowers grown in California are so common as much perfume as do similar flowers when cultivated in the milder climate of Europe.

The chief center of the flower industry for the manufacture of perfume in Europe is at Grasse, on the Mediterranean, in the south of France, where, with only about two thousand inhabitants, there are over seventy factories, giving employment to more than five thousand persons in field and factory. Many manufacturers grow their own flowers and tuberoses, and buy them daily in the market, and still others are supplied by contract, making a fixed price for a term of years for the total product of a farm. The average weight, at Grasse, is as follows: Rose leaves, 4 to 5 cents a pound; jasmine leaves, 20 to 25; orange flower leaves, 25; acacia buds, 30 to 40; tuberose leaves, 50; violet leaves, 40 to 60. These are the principal garden flowers used in Grasse. A great breadth of land is devoted to lavender, rosemary, thyme, sweet marjoram, cherry, laurel, sage, balm and other medicinal and culinary plants, which are sold at much lower rates than the products of the flowers above mentioned.

In California the orange is only cultivated for its fruit. In France the bitter or wild orange is cultivated extensively for its essential oils. From the flowers neroli is obtained, which is the base of cologne and is one of the most valuable of perfumes. Above referred to, who manufactures essential oils, oil of roses and other perfumes, says that the perfume industry in California is extending all over the world. Almost every section of the world contributes something to the perfume industry, except Southern California. A few years ago Wayne county, New York, was considered the only place that peppermint could be grown. Today Michigan produces more peppermint oil than ever New York State did, and the price of peppermint oil has been forced to the lowest figure ever known.

Mr. Gilbert thinks we have not yet begun to realize the great wealth that is contained in the orange tree, which is a source of perfumes. In regard to a few of these products, he says: "If the blossoms were distilled with water, with a beautiful oil called neroli, worth \$25 to \$40 per pound. The water that it is distilled in is worth \$1.20 per gallon. So you see there is nothing lost in this operation alone. Then, again, the prunings of the orange and lemon tree and all unripe fruit, distilled, produce 'neroli petitgrain,' worth from \$2 to \$9 per pound, and all that Europe can produce cannot keep up to the demand of the soap-maker. One man can keep a still and clean another man to cart the twigs is all the labor that this requires. People would be glad after pruning their orchards to have your cart and a valuable marked advance in the preparation of fuel materials for use. A substance of this kind could be used for heating purposes where oil and gas is used now."

Samples of the new fuel may be seen at the office of Charles Cassat Davis in the Bullard Block.

Aluminum Ware.

In the store window of the Pittsburgh Aluminum Company, on Spring street, is an interesting display of ware made from aluminum, a metal which has rapidly come into prominence for a great variety of uses as the price of the metal has been cheapened. The metal is extracted at Pittsburgh, where, and at Niagara Falls, are the only important works of this kind in the United States. Articles are made from the metal in factories

more smaller ones distilling perfumes' way into Germany. Leipzig has for many years stood as high as New Canons or Grasse ever did. The artificial odor of violets costs \$10 per ounce. Just as sure as Southern California is on the map of the United States, in a not other ten years we will be shipping some raw material for perfumers' use to the East. My home is in Southern California, and I have seen some day one of the contributors in the perfumers' laboratory, and next year, if nothing happens, I will place before you a few samples of the product.

Laux, the Spring-street druggist, makes a specialty of the manufacture of perfumes from California flowers. The only perfume that is manufactured straight is made from orange flowers. A dozen mixed perfumes are made, the best of which are essential oils, that are imported. Mr. Laux sells a considerable quantity of the orange blossom perfume, receiving orders from the East. Regarding the statement that has been made as to the possibility of collecting the fallen orange blossoms for the manufacture of perfume, Mr. Laux says that to obtain good results the flowers should be picked from the trees before they fall. He says there is not much profit in the business as at present conducted, and he regards it more as an advertisement for his other business than as a source of profit.

A San Diego paper states that Capt. Smeed of that place has discovered a method of gathering the perfume of flowers as the plant is growing. The method is certainly remarkable, if the results are as given by the San Diego Sun, which says:

"A glass funnel and heats the thin end over a spirit lamp. He then draws out the stem to a fine point. This accomplished, the funnel is filled with ice and placed over the flower. The pointed end being placed in a small glass bottle without touching it. After this the stand and the funnel are placed in a greenhouse where the flowers whose odors it is desired to collect. Gradually the vapor rises from the flowers, and, in meeting the colder surface of the funnel, it condenses and drops on the outside of the glass. From the point of condensation it trickles down until it pours into the bottle. In a surprising way the perfume is collected, and it is claimed that 90 per cent. of the contents of the bottle is perfume; the rest is water. Strange to say, this essence of the flower needs to be adulterated with spirits of wine. Otherwise, it would become sour and useless."

Clam Juice.

A clam juice and clam chowder manufacturing concern has been energetically prosecuted at Long Beach, by William Beach. The factory is located at Asbury, on the Terminal Railway, about one mile beyond Long Beach. Mr. Beach is now turning out at the rate of twenty-four cases a day, shipping the product in bulk to Los Angeles, where it is canned and cased and shipped all over the country. The proprietor is a native of Long Beach, and he is in a position to complete the output from start to finish at the factory. The supply of clams is practically unlimited. The clam juice, which can be had in all the large hotels, clubs and groceries in the city.

The Wave Motor.

The wave motor, recently described in The Times, at Potencia, four miles north of Redondo, is now getting the finishing touches, in preparation for a public demonstration, and the date of which will take place this month, the date of which will be duly announced.

During the past week a tract of ten acres adjoining the Potencia estate has been sold by the owner, Mr. Sattley, who has lived on the place for the past six years, to Mr. and Mrs. W. C. Smith of Redondo, who will make improvements there.

Asbestos.

Two large samples of asbestos have this week been put on exhibition at the Hall of Inventions, No. 111 East Second street. Part of this asbestos has been ground down fine, and has all the appearance of being of excellent quality.

Solid Petroleum Fuel.

From time to time during the past few years solid petroleum fuel has been exhibited in Los Angeles, but there has generally been some drawback to them, and they have not come into general consumption. A new fuel of this kind has just been invented by a Los Angeles man, George H. Fullerton, which has been perfected after several years of experimenting. By the use of certain chemicals, and peculiar treatment of the crude petroleum, Mr. Fullerton makes a solid mass, very black, which in some forms breaks almost with a fracture. It burns just as coal burns, does not fuse or run, gives out not so much smoke as ordinary coal, costs at present price of oil less than \$5 a ton, and gives out between two and three times the heat units that the same weight of the best coal will give. The material may be made into any form or size, and is much cleaner in handling, has comparatively little of the petroleum odor that can be stored in the sun without fusing or running, and in other ways is a marked advance in the preparation of fuel materials for use. A substance of this kind could be used for heating purposes where oil and gas is used now.

Samples of the new fuel may be seen at the office of Charles Cassat Davis in the Bullard Block.

Electric Irrigation.

A CO-OPERATIVE electric pumping plant has been put in operation at Azules, near Riverside. It is located at the home of William Irving, manager of the Riverside Trust Company, and is demonstrating the practicality of raising water by electricity for the irrigation of high lands above the canal. The Riverside Press says of the plant:

"The plant is located conveniently near the house in the arroyo, so that the water can flow by gravitation from the canal to the pump, and an eight-inch pipe. From this point it is forced through a six-inch pipe to a point 80 feet above the level of the canal, and in a four-inch pipe to a point 100 feet above the canal. The machinery works perfectly, and the water flows into a flume at a fifty-foot level as steadily as if by gravitation."

scattered all over the country. Among various articles displayed at the store here are pots and pans, stoves, hair brushes, combs, opera glasses and other useful and ornamental articles. An advantage claimed for utensils manufactured from this metal is that, besides being very light, they do not rust, and that they heat quickly.

It was recently announced that contracts had been signed for the delivery in England of a thousand tons of crude aluminum of American manufacture. It is only a few years since the manufacture of aluminum on a commercial scale was regarded as almost beyond the range of possibility. Last year there was produced in the United States alone 1,300,000 pounds of aluminum, which is about one-third of the world's total output. The first use made of the tremendous electrical energy supplied by the Niagara Falls was in the manufacture of aluminum, where such a great product is now made. Recent facilities have reduced the cost of manufacture nearly 50 per cent.

Stamped Leather.

ON Broadway between Third and Fourth streets is a small factory and store room in which the interesting process of manufacturing Mexican stamped leather may be witnessed. This product has been manufactured in Mexico for several centuries. An outline of the pattern is drawn upon the leather, after which the operator, who has to be an artist, uses a stamp to produce good results, stamps out the pattern with a number of small chisels of various dimensions. The designs on the articles are most artistic. A great variety of articles are manufactured, such as purses, picture frames, valises, belts, cigar cases, tobacco pouches, etc. Several operators are constantly employed, the work being all done by hand.

Washed Sand.

THE California Sand, Gravel and Supply Company is operating a new piece of machinery in the river bed near the First-street bridge. The sand and gravel is taken up by an elevator to a continuous bucket system to a revolving separator, where it is thoroughly washed and sorted in grades ranging from the finest sand up to the largest cobble stones. No better material can be used in plastering than this washed sand. The various sized pebbles find ready sale for roofing purposes, while the coarser material is used for street improvement purposes. The industry is growing.

Sewer Pipe.

THE company operating the Stone-ware Works in East Los Angeles has recently put in a new sewer pipe plant and is turning out large quantities of sewer pipe. They are working twelve to twenty men and also turning out a great deal of stoneware, which they are shipping all over the State. They expect before long to build another kiln.

Los Angeles Cotton.

A FINE sample of a Sea Island cotton plant, with pipe bolls, was left at the Times office this week. It was grown in Elysian Park by the park superintendent, from seed sown in April. It has often been proved that good cotton may be successfully raised in Southern California, but, as in the case of other crops such as coffee, tea and silk, the difficulty comes in when the question of labor to gather the crop is faced.

IN TRIBUTARY TERRITORY.

Money in Olives.

A FEW weeks ago The Times mentioned that David Hughes, who has a sixteen-acre olive grove at Tus-tin, in Orange county, would receive this year \$1600 for his crop. Mr. Hughes states that his grove will be much larger than the figure named, and will amount to about \$4000. Last year the crop sold for only about \$300. The trees are six years old and of the Mission variety.

Two hundred and fifty dollars an acre is certainly a remarkably good showing for a six-year-old olive grove. Mr. Hughes thinks so, and will plant forty acres more of the Mission variety, which many growers still pin their faith to, in spite of the large claims made for other olive varieties.

Deciduous Fruit Also.

DECIDUOUS fruit crops of Riverside and San Bernardino counties deserve more attention than they receive. Owing to the preponderance of citrus-fruit culture, oranges are kept chiefly in prominence, but specimens recently received show that quinces of the variety are growing in the Moreno district, and delicious peaches have been received during the past week from Banning and the Pass section. Winter quinces are to be expected to be as good and cheap. The bulk of the crop will come from the orchards of the San Bernardino range.

Electric Irrigation.

A CO-OPERATIVE electric pumping plant has been put in operation at Azules, near Riverside. It is located at the home of William Irving, manager of the Riverside Trust Company, and is demonstrating the practicality of raising water by electricity for the irrigation of high lands above the canal. The Riverside Press says of the plant:

"The plant is located conveniently near the house in the arroyo, so that the water can flow by gravitation from the canal to the pump, and an eight-inch pipe. From this point it is forced through a six-inch pipe to a point 80 feet above the level of the canal, and in a four-inch pipe to a point 100 feet above the canal. The machinery works perfectly, and the water flows into a flume at a fifty-foot level as steadily as if by gravitation."

Trust Company 45; W. G. Fraser, 15; W. S. Winters, 15; William Irving, 14. Further planting above the canal will be done this season, so as to utilize the water from material found adjacent to the plant to its full capacity.

"The success of this experiment demonstrates what can be done in the way of irrigating the fine foothill lands above the canal, and no doubt this plant will be multiplied many times within a short time."

Citric Acid.

PROPRIETORS of the new citric acid factory, at North Ontario, are quite satisfied with the result of their prospects up to date. They are going to send East to buy necessary machinery for the works, which cannot be obtained in California. This concern will be the only producer of citric acid in the United States, the supply now coming from Sicily in barrels.

Returns from Orange Groves.

AS AN evidence of the large returns that are being received this year from orange groves, the Ontario Record cites two cases:

"Week before last the Porter Bros. Company of Chicago paid Mr. Sparks of San Dimas \$5300 for the oranges on the trees of his ten-acre grove. The buyers take all risk on the crop. Mr. Sparks getting the \$5300 net without any cost as to picking or packing. The same firm paid \$5000 cash for the fruit on the fifteen-acre place of J. R. Beardsley of Covina under the same conditions as the above purchase. Mr. Beardsley states that Porter Bros. Company will make from \$1000 to \$1500 on the transaction."

Another good sale of an orange crop is reported by the Riverside Enterprise, which states that \$2000 had been paid for the crop of oranges on a ten-acre grove of six-year-old trees at that place, the sale being for spot cash.

Grain for Europe.

EVERY year some grain is shipped direct to Europe from Southern California ports. Already three shipments of wheat have been sent from San Diego and another cargo of about three thousand tons is to be sent forward.

A Flourishing Valley.

RAMONA SENTINEL, this refers to the beautiful San Pasqual Valley, in San Diego county:

"The opening of the mail route between Ramona and Escondido will bring this valley into more intimate connection with the neighboring San Pasqual Valley. San Pasqual is one of the gem spots of San Diego county. Its products have gained an enviable reputation. Its fruit are the first to get ready for market, and the ranchers consequently have the advantage of a ready market and good prices. The San Pasqual ranches are eagerly looked for in Los Angeles and San Diego. Apples seem to predominate among the fruit products. One rancher last season gathered seven tons from 250 trees. Alfalfa is an immense crop, one of the best sources of revenue. The ranchers are at present gathering their seed crop, which will be thrashed. Alfalfa seed sells for 6 cents a pound, and produces about four hundred pounds to the acre. The straw makes fine feed for cattle."

The cattle and dairy business is developing fast in San Pasqual. There are now three creameries in operation, and their products have become well established in San Diego and San Diego. The difficulty now is to secure cream, but the number of cows contributing is being increased steadily, and before long most of the ranchers will devote themselves to cattle-raising for dairy purposes. Jersey stock predominates in the herds that supply the creameries, and the prosperity of San Pasqual is assured."

Progressive Ventura.

A RECENT census of the population of San Buena Ventura shows that the population has increased from 2226 in 1890 to 3067 this year. The business at the Ventura wharf has increased so rapidly that large additions are being made to the warehouse capacity. The Ventura Independent recently published the following figures, showing the produce now stored in the warehouse:

Beans, sacks	100,000
Barley, sacks	12,000
Corn, sacks	2,500
Wheat, sacks	1,500
Flour, sacks	1,500
Dried fruit, tons	150
Walnuts, tons	15
Honey, tons	15
Miscellaneous, tons	100

The oil steamers George Loomis, averages seventy-five trips per year, and takes each trip about 6000 barrels of oil, or 475,000 barrels per annum. Lumber received per annum, 2,000,000 feet. About 200 tons of freight are received each month. Fourteen steamers, five steam schooners and one lumber vessel land per month, making in all about 240 or 250 vessels per annum."

Arizona Copper.

SINCE the decline in the price of silver, copper has been the most important mineral output in Arizona. One of the largest copper plants in the United States is that at Clifton, which is thus described by the Phoenix Gazette:

"The city of Clifton, hidden away as it is among the mountains of Arizona, is little known to the outer world, and yet it has in running operation the largest as well as the most successful copper plant in the world. The company is a Scotch concern, all of the directors living in that country. Sixteen years ago copper was found there and brought by them into El Paso, Tex., on burros. The tailings are used up now by the magnificent new smelter, and run out wonderfully well. Whole mountains of the ore are found. To the Metcalf and the Longfellow mines the Arizona Copper Company operates a twenty-inch narrow gauge railway to carry ore to Clifton, where the main plant is in blast. The company also owns the line of railway running from Clifton to Lordsburg, N. M., a distance of seventy-one miles, where connection is made with the Southern Pacific."

"Nearly the entire male population of Clifton are employed at the Arizona Copper Company. The company store is a mammoth establishment. What surprises most copper-mining people being used in its construction. The insulators, which will number 145,000, will all be tested, and none that will

and cost a small fortune, that are must be used to prevent a total collapse of this necessary structure. The chemist makes nearly all of the chemicals from material found adjacent to Clifton, thus saving the outlay of these necessities."

"There is a complete gas works, electric light plant on the ground, all built by the company. Soon a new library will be built for the employees."

Building at Phoenix.

PHOENIX HERALD reports that four brick buildings are now under course of construction, the largest a three-story building with 100 feet front and 137 feet deep. The others are two-story buildings, but not so extensive. The business of the city warrants the erection of such buildings. Another, an opera house, will no doubt also be in course of construction."

The Big Orange Crop.

STATISTICS were recently published in The Times showing the enormous amount of tins of orange wrappers that would be necessary to wrap the coming orange crop. Another indication of the size of the crop is furnished by a statement of a Fullerton paper, that at least 20,000 feet of lumber has gone out of the yard there to be used for tree props.

Celery.

REGARDING celery culture in the great lands of Orange county, the Santa Ana Blade gives some interesting information, from which the following is extracted:

"Seven miles west and one mile south of Santa Ana are located the famous celery fields of Orange county. Most of the celery is grown on the great lands, comprising nearly one thousand acres. These lands, together with the joining tracts of sandy loam soil, form one of the most wonderfully fertile sections in Southern California. This section has for four years produced such abundant yields that the owners have prospered far beyond their less fortunate neighbors. It is only a few years since they learned of the fertility of their lands to the growth of celery. Before that time they were used in the production of corn, alfalfa, potatoes and onions, and yielded so fabulously that their owners waxed fat and contented, and always possessed a plenteous purse. As much as 300 sacks of potatoes, 140 bushels of corn and 800 bushels of onions have been produced from an acre, and an average yield of these various crops is probably reach two-thirds of these respective figures."

"Growing celery is a beautiful plant. Its dark green leaves and stalks standing in regular rows against the black soil is so pleasing to the eye that one can scarcely pass without pausing. Although the great soil is exceedingly rich it will decline in fertility unless some suitable fertilizer is used, and one of the first of these is a light or russetness is declining is a light or russetness which will attack most plants grown on this soil."

"In order to secure uniformity of quality, cheap transportation and the best possible price, two associations have been incorporated. One, the Westminster Celery Growers' Association, president; and another, the California Celery Company, Mr. Winters, president. Each of these associations sends a representative to the city, where all the celery is shipped from this section, to receive and market the crop. There are about 700 acres in celery, and it is estimated that the yield will be not less than 250 carloads, which will probably average \$200 per acre, making a total sum of \$125,000, or \$150 per acre. It costs from \$22 to \$29 per acre to set and tend the plants to maturity, and about \$35 more per acre to gather the crop and put it on board the cars."

A Big Mine.

THE following facts in regard to the celebrated Congress mine of Arizona, are from a recent report of the superintendent:

"Four hundred and twenty-five men are employed; monthly pay roll, \$200,000. The output is 120 tons of ore, averaging \$120, and a shipment of 25 cars per month of high-grade ore. The 40-stamp mill crushes the ore from three shafts. No. 1, 1750 feet deep; No. 2, 1100 feet, and No. 3, 1100 feet. No. 1 is lighted by electricity. A new hoisting plant has been ordered for No. 2, capable of going to a depth of 3000 feet, and in shaft No. 3 a similar plant will be placed. A cable of hoisting a load of 20,000 pounds at the rate of 1000 feet per minute, for 1000 feet depth. At the cyanide mill 100 tons of cyanide are handled daily. The company intends to enlarge this branch of the business."

Developing Electric Power.

REDLANDS FACTS tells how the work being done in the Santa Ana cañon by the Eastern California Power Company has changed that arid and picturesque section to a village of 500 people within a few months. The work will involve the expenditure of about \$100,000.

"The waters of the Santa Ana will be diverted at the junction of Bear Creek by a small dam into tunnels and flumes, having a carrying capacity of 11,000 inches, and conveyed three miles down the cañon to Keller Creek, where the power-house will be located. Of this distance half will be tunnels through the hills and half flumes. There are eighteen tunnels, some of which are already through and ready to be cemented or bricked, and the formation of the hills through which they pass may demand."

"The power-house will be built of concrete and iron, absolutely fireproof. The dimensions are 130x40, the walls being two feet thick. The six machines, any one of which can be operated alone, will generate 22,000 horse power, which the transformers will increase to 32,000 volts. The reservoir will be thirty inches in diameter. The water wheels into which the water will be sent at a pressure of over 300 pounds will be 82 inches in diameter, six large ones and three smaller ones."

"For the head used this plant will have a greater volume of water than any plant now in existence. A great deal of the machinery is a great deal was made to order by a large eastern firm, especially for the Southern California Power Company and is all of the latest electrical inventions."

"The line from the power-house to Los Angeles will be eighty miles long, thirty tons of wire and over 1000 poles being used in its construction. The insulators, which will number 145,000, will all be tested, and none that will

not stand a voltage of 65,000 volts will be put up. About a third of them have already been tested at Colton. The poles and wire are now being distributed along the line, and the work of putting in the poles and stringing the wire will be begun in a short time. There will be two sub-stations, one at Pasadena and one at Los Angeles, and most of the power will be used for lighting and running the electric cars in Los Angeles and Pasadena.

Arizona Cattle.

ARIZONA cattle men, who have had hard times for a number of years, are at present in a cheerful frame of mind. Cattle are still rising in price, and Los Angeles buyers are offering \$3.25 a head on the hoof. Two years ago cattle were selling at about \$2 apiece, which are now in demand at three times that figure. Several trainloads a week are being shipped, and the shipments would be much greater if owners would be willing to accept present prices.

Building Boom at Riverside.

FROM Riverside it is reported that there is such activity in building that contractors have had to send to Los Angeles for carpenters. There are at present fourteen new residences under construction, at a cost of about \$30,000, and there have been built within the past few months eleven new houses at a cost of about \$14,000.

Growing Redlands.

THE monthly report of receipts at the Redlands postoffice for October, 1897, as compared with the same month in 1896, is as follows:

	Oct. 1896.	Oct. 1897.	Gain.
Stamps sold	\$32.14	\$127.12	\$94.98
Envelopes sold	147.79	253.25	105.46
Box letters	366.30	380.50	14.20
Totals	\$1065.23	\$1272.22	\$206.99

This shows a total gain of 22 1/2 per cent. over the postoffice business of October last year, which is certainly a creditable record for Redlands.

Sugar Beets.

A SAN LUIS OBISPO paper, the Breeze, says it is a mistake that San Luis Obispo county has been negotiating for the Oxnard factory; that county, it says, has not had any dealings with the Oxnards, but the people of that and Santa Barbara county are striving to secure the location of the projected new Union Beet-Sugar Company's factory on the line of the Pacific Coast Railway.

RAND SUITS ENDED.

FAMOUS MINING LITIGATION IS AMICABLY SETTLED.

The Original Discoverers of the Claims Which Created Randsburg Come Again Into Possession of Their Property—Importance of the Event.

The litigation which for two years past has involved the most valuable mining properties of Randsburg has been brought to an amicable conclusion. A stipulation has been filed in the United States Circuit Court which finally settles the rights of all parties in interest, and the suit, which gave every promise of a protracted and bitter contest, is at an end. This result is of the greatest importance, not only to the persons immediately concerned, but to all who are interested in the growth and prosperity of Randsburg.

The first mining locations in the Randsburg district were made in April, 1895, by John Singleton, F. N. Moores and C. A. Burcham. They were the pioneers whose discoveries drew attention to the new field, and attracted the rush of miners and prospectors who founded the town of Randsburg.

Almost from the outset the claims located by Singleton, Moores and Burcham have been involved in litigation. Dissensions among themselves and others who had become interested in the property were carried into the courts. The litigation was protracted and the parties to the suit and in payment for their services they acquired an interest in the mines.

Finally, negotiations were commenced with a view to an amicable settlement of the litigation. These efforts proved successful. An agreement was reached adjusting the rights of all concerned. By its terms Singleton, Moores and Burcham came again into the ownership of the property of which they were the discoverers. Mrs. Burcham receives a small interest by gift from her husband, and Mrs. Burcham also acquires an interest. Reddy, Campbell & Metson have retained all their interest to the original owners, by deed recorded yesterday in Kern county.

W. A. Harris, of Gardiner, Harris & Rodman, who have represented some of the parties to the suit, said last evening: "Throughout the litigation the mines have been worked continuously. There has never been a moment when they failed to yield a profit. There has never been a foot of development that has not added to their value. Not a dollar of capital has been put in since the litigation began, the development being carried on wholly with the output of the mines. There are now sixty men employed and fifteen stamps are in operation."

"The owners are now all in harmony. Their troubles are ended. Work will be carried on upon a larger scale than ever before, and the output of the mines will be greatly increased. The prospects of the property were never so bright. The owners will incorporate but the stock will not be placed upon the market. The name of the new corporation will be the Yellow Aster Mining and Milling Company. The owners are really entitled to use the name of Rand, as they gave it to the claims when they were originally located, but it has been used by so many subsequent prospectors that it was thought best to abandon it. The new corporation is capitalized at \$1,000,000. All of the owners expect to make Los Angeles their home, and they will doubtless have considerable interests here."

"The property of the new corporation embraces twenty claims covering 500 acres of mining ground. It is undoubtedly the most valuable group of mines in Southern California. Ore has been developed to a depth of 700 feet from the apex of development. Much of it is high grade ore, and there are immense bodies of low-grade ore that can be profitably worked as soon as railroad facilities have been established."

The culmination of the Rand litigation promises to be of the greatest importance to Randsburg. The property involved is variously estimated at from \$500,000 to \$1,500,000. It will now be thoroughly developed on a larger scale than ever before, and the resulting benefits to the town and the district will be very great.

THE PUBLIC SERVICE.

ONE HUNDRED FEET.

PROPOSED WIDTH OF BUENA VISTA STREET.

Councilmen Believe a Greater Width is Impracticable—Will Be Considered Further.

MRS. CREEDE WITHDRAWS.

RECOMMENDS G. H. STEWART FOR ADMINISTRATOR.

N. C. CREEDE'S THOUSANDS TOO MUCH FOR HER TO HANDLE—JUDGE ALLEN DECIDES TWO MORE LAND SUITS AGAINST SOUTHERN PACIFIC.

At a meeting of the Board of Public Works held yesterday the matter of the proposed widening of Buena Vista street came up for consideration. The Councilmen present were agreed that no greater width than 100 feet would be practicable. An effort has been made to secure a width of 125 feet, but it meets with strong opposition.

Mrs. Louisa Creede has withdrawn her petition for the appointment as administratrix of the estate of N. C. Creede, and recommends that the court appoint George H. Stewart to serve in that capacity. Mrs. Creede's attorneys declare that she is unable to undertake the responsibility of taking charge of her late husband's estate, and therefore withdraws in favor of one who is better able to withstand the strain and more competent to look after the business matters that will arise.

Judge Allen has decided two more suits against the Southern Pacific Company, brought by purchasers of lands, who demanded that the money advanced upon the property, which was reclaimed by the government, be refunded to them by Uncle Collis.

[AT THE CITY HALL.]

BUENA VISTA STREET.

PLANS FOR WIDENING AGAIN UNDER CONSIDERATION.

Board of Public Works, in Favor of a Width of One Hundred Feet. Final Inspection of Fourth and Fifth Streets.

The plans for the widening of Buena Vista street were considered yesterday by the Board of Public Works, though no definite action was taken. S. W. Carver appeared before the board and urged that the width of the street should be established at 125 feet.

At the afternoon session the board again discussed the matter, and it was agreed that it would be impracticable to obtain a width of more than 100 feet. One of the Councilmen present said that the Southern Pacific Company has a frontage of 2000 feet on Buena Vista street, and will strenuously oppose any plan of widening to 125 feet. The company will consent, it was said, to a width of 100 feet. It was finally agreed that the matter should be referred to Councilmen Baker, Nickell and Hitchcock. This committee will also consider the proposed widening of Marchessault street from Buena Vista street to the Plaza.

The board referred to the City Engineer and the City Attorney for investigation the petition of property-owners asking that the Southern California Railway be compelled to restore to the former level the tracks at the crossings of Ella street, Arroyo Seco avenue, Dayton avenue and Moorpark street. Recommendations were adopted by the board as follows: That the proceedings be abandoned for the opening of Eleventh street from Central to Stanford avenues; that the bid of P. J. Richmond for improving Avila street be accepted; that the petition for grading streets be referred to the City Engineer for ordinance of intention; that the protest of R. W. Poindexter against the Street Superintendent; that the petition for sidewalk on the east side of Rich street between Pico and Sixteenth streets be referred to the City Engineer to prepare ordinance of intention; that the petition of voters in the Sixty-fifth Precinct, asking a change of ward boundaries, be referred to the City Attorney; that the petition to improve Washington street from Central to Compton avenue be referred to the City Engineer to prepare ordinance of intention; that in the matter of the proposed storm drain for Fremont avenue and other streets, the City Engineer present specifications and estimate of cost; that the City Engineer's report on the storm water at Paloma and Twenty streets be referred back to him to ascertain whether a twelve-inch pipe is sufficient, and if so to prepare estimate of cost.

Final Inspection of Streets.

At 10 a.m. today Street Superintendent Drain will make final inspection of the improvement on Fifth street, between San Pedro street and the Southern Pacific depot.

At the same hour final inspection will also be made of Fourth street between Central avenue and Alameda street.

Filed with the City Clerk.

B. Jose Maria Topia has filed a petition with the City Clerk asking the County to direct a sale of the premises described as lot 49 of Alfred Moore's subdivision. He states that he has built a home for himself and family, and fears that it will be lost unless a sale is ordered.

Property owners on the west side of Fremont avenue between Third and Fourth streets have petitioned the Council for a six-foot sidewalk.

A COMPROMISE.

Babcock Wins and Loses in His Damage Suit.

The jury in the Babcock damage suit was out nearly five hours yesterday before it decided upon a verdict. Instead of awarding judgment against the Los Angeles Traction Company for \$5000 damages in the sum of \$499 was allowed.

E. W. Babcock brought suit against the Traction Company for \$5000 damages for injuries sustained by falling from the car while it was making the curve at a high rate of speed. The company, on the other hand, contended that Babcock attempted to alight from the car while it was in motion, falling after it came to a standstill after giving the signal to the conductor.

Old Style and New Style Women

Side by side, in portrait form. The portraits of Revolutionary daughters, and their modern posterity—the past and present of the same good old American stock. In the October PURITAN.

10 cents at all news-stands, \$1.00 a year of Frank A. Munsey, New York.

[AT THE COURT HOUSE.]

MRS. CREEDE BACKS OUT.

DOES NOT WISH TO BE ADMINISTRATRIX OF CREEDE'S ESTATE.

Recommends That George H. Stewart Be Appointed—Meanwhile the Guardianship Matter is Being Repeatedly Postponed.

A new and somewhat mysterious turn developed in the Creede case yesterday in Department Two. Mrs. Creede, widow of the late Nicholas C. Creede, asked that she be appointed administratrix of her late husband's estate be set aside, and that George H. Stewart be selected as administrator.

Mrs. Creede's attorneys offer no explanation further than that the estate being a large one, some person of experience in business affairs should be chosen to take charge of it.

Both Mrs. Creede and Mr. Stewart filed petitions, one withdrawing a former petition, the other praying for the appointment as administrator.

In Mrs. Creede's petition a concession is made to the effect that the estate is greater and more complicated than the widow cares to take upon herself to settle, and therefore another person, George H. Stewart, is recommended. Mrs. Creede also alleges that Edith Dorothy Creede and she are the only heirs-at-law.

Mrs. Creede's petition for the appointment as administratrix will be withdrawn on Monday, and the matter will come up for hearing before Judge Clark. Should the claim of Mrs. Creede to an interest in the estate be set aside by the court, the present proceedings will have been a mere waste of time and pains. The will bequeathing Creede's estate to Edith Dorothy Creede, the deceased adopted daughter, will then be held to be valid.

Mrs. Creede, however, maintains that no genuine will has been found, and that, therefore, she is entitled to a wife's share of the estate. The question of guardianship of Edith is in Mrs. Creede's hands for the appointment will not be settled until after the matter concerning the will is disposed of. The case was set for hearing Monday, but it has been postponed from time to time in order that it may come up after the main issue is settled.

N. C. Creede, whose property is the ground upon which the pending litigation is based, died in this city in July last, leaving an estate estimated to be worth \$100,000. It is stated that a long time prior to his death, Mr. Creede and his wife agreed to separate, the wife to receive a certain sum of money in consideration of her share to be relinquish all claims upon her husband and his estate. Upon Mr. Creede's death, the wife appeared and presented a claim to a share of the estate, representing that she had never been divorced from Creede, and was entitled to his share of the property owned by her husband at the time of his death.

THE HOLINESS BAND.

Judge Shaw Decides an Old Suit Between the Factions.

The Los Angeles Holiness band has been mixing a little cold law with its street preaching. A "scrap" in the camp several weeks ago, and Judge Shaw passed upon the merits of the contentions of the contending elements yesterday.

The difficulty arose in this way: Some time during the early part of this year a question arose among the leaders of the band in which the degree of godliness of certain members was discussed. After due deliberation it was determined that all those who did not conform to the standard established by the "management" should be expelled from the organization and denied the gracious privilege of further communion with the Supreme Being, according to the plans and specifications of the organization. One by one, members of the band were dropped from the membership roll. Whenever a brother or sister was found to have fallen short, lack of length or fervor, a special meeting was called, and the next day the membership roll contained a name or two less than the previous day. This process was continued, it appears, until the number of the expelled exceeded the number of members in "good standing."

Early in the summer the ostracized element got together and decided to resolve itself into the only genuine Holiness Band. Objecting to the use of the name made by the remaining members of the original organization in the nature of injunction proceedings, a temporary restraining order was granted, and the matter was solved upon motion of W. D. Gould, Esq., who had been engaged by the opposition. Subsequently a decision was rendered in the suit in which the injunction was granted, and Gould's retainers lost their case. Suit was then brought against the successful managers of the band, who have been paid Gould as attorney's fees upon the ground that the debt had been contracted in the name of the organization. Judge Shaw decided adversely upon this point yesterday.

RECEIVES ANOTHER SLAP.

Judge Allen Decides Two More Land Suits Against Uncle Collis.

Judge Allen has followed up his decision in the cases of Deutch and Elms against the Southern Pacific Company with two more to the same effect. The plaintiffs in the suits in which the decision was rendered are Lugura A. Blubaugh, W. C. Simpson, Frank McIntee, J. S. Purdy and C. W. Allen.

"While it is clear that the receiver is not the party to Judge of the necessity of enforcing the individual liability of the stockholders, and that the Comptroller is the party to make such decision, it is doubtful whether Congress intended that the enforcement of such individual liability should be under the direction of the Comptroller."

Judge York Decides a Case of Much Interest.

A decision touching upon the individual responsibility and liability of stockholders in corporations was rendered by Judge York yesterday in the case of T. E. Mackinlay, receiver of the Bank of America, National City, S. D., vs. Mary A. Byram, who now resides in this city. Mrs. Byram has been the owner of six shares of the bank's capital stock for two years. After she came into possession of the stock the bank failed and was liquidated, the receiver being subject to the control of the Comptroller of the Currency of the United States. Mackinlay was appointed receiver. He found that in order to pay the debts of the bank it would be necessary to make an assessment and requisition upon the shareholders for \$10 upon every share of stock held by them. Suit was brought against Mrs. Byram for \$120 to cover the amount of the assessment and interest.

The complaint was filed, in which it was alleged that the statement of facts was insufficient to constitute a cause of action in that it did not appear that the Comptroller had authorized the receiver to bring suit against Mrs. Byram. The statute under which the suit was brought provides that the receiver, in the event of the failure of the bank, may enforce the liability of the stockholders when found necessary, the admissibility of necessity of such proceedings being determined by the receiver, and the receiver is authorized to obtain special instructions from the Comptroller before proceeding against the stockholders. The court has held that stockholders are not ordinary creditors of the bank, but are rather in the list of creditors. Their stock being regarded as a liability, they are entitled to the surplus of the bank, and if any should remain, after the payment of the debts. They are only conditionally liable for those debts after all the ordinary resources of the bank have been exhausted, and ought not to be proceeded without due regard to the circumstances of the case. The determination on the part of those charged with winding up the affairs of a bank to resort to this ultimate remedy, the court holds, requires the exercise of discretion, and a receiver ought not to take it upon himself to decide so important a question without referring to the Comptroller, under whose direction he acts. Although it is his duty to collect the assets of the institution, he does not distribute them and cannot ordinarily know, without reference to the Comptroller, whether a prosecution of the stockholders will be necessary or not.

While the receiver is under the direction of the Comptroller, he is not required to seek special instructions upon every act. The Supreme Court has ruled in several instances that "with regard to ordinary assets and debts no special direction is needed. No unusual exercise of judgment is required. They are to be collected, of course. That is what the receiver is appointed to do."

along its route between the Tehachapi Pass and the Columbia River, through which a roadbed should actually be constructed and tracks laid and operated upon. In after years the company disposed of much of the land thus acquired to settlers. In the agreement made between the purchasers and the railroad company the latter in many instances stated that patents to the lands had not yet been secured from the government, and agreed that in the event such patents could not be obtained, the money advanced on account of the purchase price should be refunded. The government subsequently decided that the railroad company had forfeited all claims to the lands in that it had failed to meet the conditions of its contract by completing its line through the territory described in its agreement. In 1892 President Cleveland issued a proclamation in which he declared the railroad's interest in the lands to have been forfeited to the government. The Southern Pacific Company was thus unable to furnish a title to the land, and the purchasers declared their intention to sue the company for the money advanced. The railroad company refused to comply and the matter was taken into the courts. In every instance thus far the railroad company has lost.

LIABILITY OF STOCKHOLDERS.

Judge York Decides a Case of Much Interest.

A decision touching upon the individual responsibility and liability of stockholders in corporations was rendered by Judge York yesterday in the case of T. E. Mackinlay, receiver of the Bank of America, National City, S. D., vs. Mary A. Byram, who now resides in this city. Mrs. Byram has been the owner of six shares of the bank's capital stock for two years. After she came into possession of the stock the bank failed and was liquidated, the receiver being subject to the control of the Comptroller of the Currency of the United States. Mackinlay was appointed receiver. He found that in order to pay the debts of the bank it would be necessary to make an assessment and requisition upon the shareholders for \$10 upon every share of stock held by them. Suit was brought against Mrs. Byram for \$120 to cover the amount of the assessment and interest.

The complaint was filed, in which it was alleged that the statement of facts was insufficient to constitute a cause of action in that it did not appear that the Comptroller had authorized the receiver to bring suit against Mrs. Byram. The statute under which the suit was brought provides that the receiver, in the event of the failure of the bank, may enforce the liability of the stockholders when found necessary, the admissibility of necessity of such proceedings being determined by the receiver, and the receiver is authorized to obtain special instructions from the Comptroller before proceeding against the stockholders. The court has held that stockholders are not ordinary creditors of the bank, but are rather in the list of creditors. Their stock being regarded as a liability, they are entitled to the surplus of the bank, and if any should remain, after the payment of the debts. They are only conditionally liable for those debts after all the ordinary resources of the bank have been exhausted, and ought not to be proceeded without due regard to the circumstances of the case. The determination on the part of those charged with winding up the affairs of a bank to resort to this ultimate remedy, the court holds, requires the exercise of discretion, and a receiver ought not to take it upon himself to decide so important a question without referring to the Comptroller, under whose direction he acts. Although it is his duty to collect the assets of the institution, he does not distribute them and cannot ordinarily know, without reference to the Comptroller, whether a prosecution of the stockholders will be necessary or not.

While the receiver is under the direction of the Comptroller, he is not required to seek special instructions upon every act. The Supreme Court has ruled in several instances that "with regard to ordinary assets and debts no special direction is needed. No unusual exercise of judgment is required. "In the construction of a United States statute the decision of the Supreme Court of the United States is the highest authority. That court has decided that in such cases it is necessary that the fact that the Comptroller has decided that it was necessary to institute proceedings against the stockholders to enforce their personal liability, and to decide whether the whole or a part—and if only a part, how much—should be collected, must be distinctly averred in all such cases. I shall construe that authority as conclusive of the question involved here."

SOCIAL TOPICS.

Discussion of Simplicity in Entertaining, Decoration and Dress.

The Committee on Social Topics was in charge of the programme at the Friday Morning Club meeting yesterday, and "Social Simplicity" was the subject discussed. Brief papers were read by Miss Collier and Mrs. J. D. Hooker, the former taking up the subject of simplicity in entertaining, and the latter, in decoration. There was an unusually large attendance and the discussion which followed the papers was very generally participated in. Among the speakers were Mrs. Margaret C. Graham, Streckerwald, Barnes, Lou V. Chapin, Weinburg, and Prof. Dickinson. Mrs. Chapin discussed simplicity in dress and said that she thought that the root of the trouble was a question as to be found in the public schools, and that the best way to overcome the difficulty was to put the children into uniforms.

Mrs. Weinburg took emphatic exception to this view, and declared her belief that the trouble was in the home, and that if children were given the right ideas there, no trouble would be unnecessary; that children should be taught to respect other people, not for what they had or wore, but for what they were themselves.

Among the guests of the club were: Mrs. J. E. Spangler, Lou V. Chapin, Thompson, A. W. Richards, Reese Avery, Vernon, Orey, M. C. Callender, G. W. Lawrence, Brodbeck, Upton, Therese Levy, C. B. Woodhead, Annie L. Holly of Elgin, Ill.; S. E. Newton of Aurora, Ill.; W. C. Lantz of South Bend, Ind.; Hutchinson of Cleveland, O.; L. E. Michener of Pasadena, Martha Davis of Terre Haute, Ind.; Ellen Matlock of Kansas, W. W. Polk of San Francisco; Mrs. J. H. Franchot, Anderson of New York City, James Flagen of Spokane Falls, James Crosby of New York; Misses Jessie Crosby of New York, Kate D. West of Philadelphia, Rivers of Montgomery, Ala.; Gertrude Mason, Miss Merwin of Pasadena.

MUSICAL MENTION.

Mr. and Mrs. Georg Henschel, who scored such a great success at their song recital on Thursday evening, will make their last appearance in this city this evening at Simpson Tabernacle. The following programme will be rendered:

Duet from "Giannina e Bernadone," (Cimarosa)—Mr. and Mrs. Henschel.
(a)—Sacred song, "Wait Thou Still," (1680) (J. W. Frank) (b)—Serenata from "Aspasia," (Handel) (c)—Viva from "Elmira," (Handel)—Mr. Henschel.

(a)—Cantata, "My Mother Bids Me Bind My Hair," (Haydn) (b)—Song, "Nymphs and Shepherds," (Purcell) (c)—Song, "Where Be Goings?" (Old Cornish)—Mrs. Henschel, (Carissimi) (d)—Cantata, "Vittoria," (Carissimi) (e)—Song, "Wohin," (Schubert) (f)—Romance, "So Willst du des Armen," (Brahms)—Mr. Henschel.
(a)—Song, "Der Lorelei," (Liszt) (b)—Der Nussbaum, (Schumann) (c)—Tausendstunde, op. 56, No. 3 (new) (Henschel)—Mrs. Henschel.
Duet, "Oh! That We Too Were Young," (Henschel)—Mr. and Mrs. Henschel.

(a)—Song, "Auferstehen," (Resurrection) op. 57, No. 3, (Henschel) (b)—Ballad, "The Rusted Mill," (Goring Thomas) (c)—"Marguerite," (Old French) (d)—"Spring," (Henschel)—Mrs. Henschel.
Duet from "De Nouveau Seigneur de Village," (Bolidieu)—Mr. and Mrs. Henschel.

All About a Horse Trade.

About a month ago an ignorant German complained to the District Attorney that he had got the worst of a horse trade with J. A. McMillen, and applied for a complaint. He was told that he had no ground for a criminal action. The facts were published in The Times. Last night McMillen brought to The Times office a German, who said he was the man referred to, and tried to get from him a denial of the story. The German was willing to deny anything, and he denied that he ever applied for a complaint. He also declared that the District Attorney could not be believed, any way. This was rather more than was expected of him, and he finally admitted that he was affected by liquor when he went to the District Attorney. He said he was perfectly satisfied with his trade with McMillen. The latter wanted to have it known that McMillen, another horse-trader who got into trouble, is not his partner.

Postal Changes.

(SPECIAL CORRESPONDENCE OF THE TIMES.) WASHINGTON, Nov. 6.—The Post-office Department today ordered the following changes in the postal service affecting California:

Railroad service.—Route 17602, Stockton to Milton, Southern Pacific Company, 30.60 miles. From October 14, 1897, deduct 5.40 miles from distance, the company having submitted a corrected distance circular, which showed that the entire length of the route is 25.20 instead of 30.60 miles.

Mail service.—Route 276, 070, Wilmington, Los Angeles county, from Southern Pacific Company, Route 176013, From November 18, 1897.

Star Route service.—Route 76343, Santa Cruz to Henry Dixon, From November 15, 1897, increase service to six times a week.

California Pensioners.

(SPECIAL CORRESPONDENCE OF THE TIMES.) WASHINGTON, Nov. 6.—Pensions were granted to Californians today as follows:

Original—Jabez Banbury, Pasadena. Increase—George E. Morgan, Los Angeles; Zedekiah Pickett, Los Angeles. Original widows, etc.—Minor of John W. Collins, Los Angeles; Amanda M. McCoy, Eureka; Eleanor E. McKarny, Greenville.

Active Canvassing Begun.

Secretary Walton of the Fiesta Committee reports that committees and canvassers will start out this morning to make an active canvass of the city for the purpose securing subscriptions for La Fiesta of 1898. Work for the festival will begin next week, if at all.

Californians in Washington.

(SPECIAL CORRESPONDENCE OF THE TIMES.) WASHINGTON, Nov. 6.—C. R. Darrson and wife of Los Angeles arrived at Washington today, and are registered at the Hotel Wellington.

Mrs. E. H. Tucker of Oakland, Cal., is at the St. James Hotel.

THE TIMES ALMANAC.

From now until January 1, 1898, this almanac will be given free with every prepaid three-month subscription to the Daily Times, or with every prepaid \$1.50 yearly subscription to the Saturday Times and Weekly Mirror, or upon the receipt of 25 cents cash, will be mailed, postage paid, to any address.

AT 6 MONTHS OLD 35 DROPS—35 CENTS

EXACT COPY OF WRAPPER.

Castoria is put up in one-also bottles only. It is not sold in bulk. Don't allow anyone to sell you anything else on the plea or promise that it is "just as good" and "will answer every purpose." See that you get C-A-S-T-O-R-I-A.

The Randsburg Gold Mining, Milling and Water Supply Co.,

OPERATING

THE VAL VERDE GOLD MINES...

JOHANNESBURG, CAL.

A limited amount of stock of this wonderfully rich property is yet for sale. During the past month we have taken out hundreds of tons of the richest ore in the now celebrated Rand Mining District, assuring permanency and success. In order to defray expenses of erecting a ten-stamp mill the Company has decided to place upon the market

100,000 Shares of this Stock.

Investigate this proposition and take advantage of a lifetime opportunity. Dividends will be declared and paid at an early day. For particulars, etc., apply to

JAS. S. WILDE, Secretary,
319 Wilcox Building, Los Angeles, Cal.

DR. MEYERS.

Diseases and Weakness of Men

His long experience and the thousands of successful cures have made him the most difficult cases on record he has cured in that time is a guarantee that all sufferers should seek his assistance. His cure is as permanent as they are speedy. No matter what may be your ailment you should consult him at once. He can make you strong, robust, manly. He can cure your affliction in a short time and at a reasonable price. A friendly talk with him will cost you nothing.

Do Not Experiment.

Dr. Meyer restores manhood by his own tried and never-failing methods and remedies. For more than ten years his treatment has been a universal success, and the number of restored patients increases every month.

A Warning Fad.

Dr. Meyer has received such a large number of complaints and inquiries, both to person and by letter, concerning a warning fad known as "Electric Belts," that he feels called upon to give the public a few facts about the jolly and dangerous appliances.

They Are Made To Sell.

And consequently to wear, but why they should be worn is one of the unsolved problems of the Nineteenth Century. Electric belts have been abandoned as worthless and dangerous hobbles throughout the East, where many people have had their flesh burned and their clothing ruined by wearing them.

No Pay Till Cured.

...DISEASES AND WEAKNESS OF MEN...

Consultation and Advice Free

At office or by letter. If you cannot visit the city write for symptom list and private book for men. All correspondence confidential.
